

Publikationen Dr. med. Albrecht Pfäfflin

Pfaefflin A.: An insect-compartment model as contributory to explain the seasonality of influenza. *Clin Lab* 2018;64:1965-6

Pfaefflin A, Schuster K, Braun R.: Short Centrifugation to Ameliorate Turn-Around-Time in Routine Coagulation Testing. *Clin Lab* 2017;63:1945-1947.

Pfäfflin A, Schleicher E.: Impeded centrifugation in plasmocytoma serum. *Clin Chem Lab Med* 2009; 47: 1016

Fisher E, Grallert H, Klapper M, Pfäfflin A, Schrezenmeir J, Illig T, Boeing H, Döring F.: Evidence for the Thr79Met polymorphism of the ileal fatty acid binding protein (FABP6) to be associated with type 2 diabetes in obese individuals. *Mol Genet Metab* 2009;98:400-5

Tschritter O, Schäfer SA, Klett J, Pfäfflin A, Häring HU, Hennige AM, Fritsche A.: Insulin detemir causes increased symptom awareness during hypoglycaemia compared to human insulin. *Diabetes Obes Metab* 2009;11:1017-26.

Pfäfflin A.: Doubt on prevention of false-positive results of cardiac troponin I by recentrifugation. *Clin Chem Lab Med* 2009;47:892-3.

Pfäfflin A.: Highly sensitive cardiac troponin I assay leads to lowered specificity *Clin Chem* 2009;55:1749.

Pfäfflin A.: Native prothrombin as an alternative to prothrombin time determination for monitoring oral anticoagulant therapy. *Clin Chem Lab Med* 2009;47:242-3.

Pfäfflin A.: Remarks on the acute intermittent porphyria. *Ann Clin Biochem* 2009; 46:347-8.

Pfäfflin A, Schleicher E.: Inflammation markers in point-of-care testing (POCT). *Anal Bioanal Chem* 2009;393:1473-80

Pfäfflin A, Müssig K, Schleicher E.: Interference of paracetamol (acetaminophen) with a commercially available highperformance liquid chromatography analysis of serotonin leading to falsely low serotonin levels. *Ann Clin Biochem* 2009;46:146-8.

Müssig K, Pfäfflin A, Knaus-Dittmann D, Horger M, Morike K, Häring HU, Schleicher E.: Severe paroxysmal hypertension, elevated urinary dopamine excretion, and adrenal mass in a patient with parkinson's disease: Pheochromocytoma or not. *Exp Clin Endocrinol Diabetes* 2007;115:83.

Pfäfflin A, Schleicher E, Müssig K. : 3-o-methyldopamine (3-o-methoxytyramine) interferes with the internal standard 3,4-dihydroxybenzylamine in a plasma catecholamine HPLC method. *Clin Chem* 2007;53:1976-7.

Pfäfflin A, Schleicher E. : Laboratory method for diabetes mellitus. *Diabetologie und Stoffwechsel* 2007;2:R79-R87.

Pfäfflin A, Brodbeck K, Heilig C, Häring H, Schleicher E, Weigert C.: Increased glucose uptake and metabolism in mesangial cells overexpressing glucose transporter 1 increases interleukin-6 and vascular endothelial growth factor production: Role of ap-1 and hif-1alpha. *Cell Pysiol Biochem* 2006;18:199-210.

Müssig K*, Pfäfflin A*, Häring H, Schleicher E.: Dipyrone (metamizole) metabolites interfere with hplc analysis of plasma catecholamines but not with the determination of urinary catecholamines. *Clin Chem* 2006;52:1829-31.
